

## Open Books Announcement

### 210 and 220 Series 10/100/1000 Switches

Extreme Networks<sup>®</sup> is pleased to announce the introduction of two new low-end gigabit edge switch families. Both switch families have 12, 24 and 48 half-duplex/full-duplex port models in both PoE+ and non-PoE variants. Both families have flexible management options that are not typically available in low-end gigabit switches. The 210 and 220 switches can be managed via an excellent Graphical User Interface (GUI), an industry-standard Command Line Interface (CLI very similar to Cisco), ExtremeManagement or ExtremeCloud. As part of the 200 Series switch family launch, Extreme is introducing a new Limited Lifetime Hardware Warranty with Express Advance Hardware Replacement - B (LLW-eAHR-B) on the new 210 and 220 Series switches. LLW-eAHR-B warranty provides coverage which supports customers' basic parts replacement and technical support needs.

The 210 switch family has 12, 24 and 48 port 10/100/1000 switches with 1Gb Ethernet SFP uplinks. These standalone switches support Layer 2 switching and static routing. The 220 switch family has 10Gb Ethernet SFP+ uplinks. These switches add stacking (up to 4), RIP routing and external redundant power for the 24 and 48 port switches to the feature set. Additionally the two 48 port 220 switch models have two ports that support Long Range Multi-mode (LRM) optics. Please note that all 200 Series switches do not run the EXOS operating system.
