

Quick-e-Quote Fact sheet

What is Quick-e-Quote?

Quick-e-Quote is an easy to use, email based quotation service, available 24hrs, 7 days a week. It provides automated pricing and availability presented in a formal quote format.

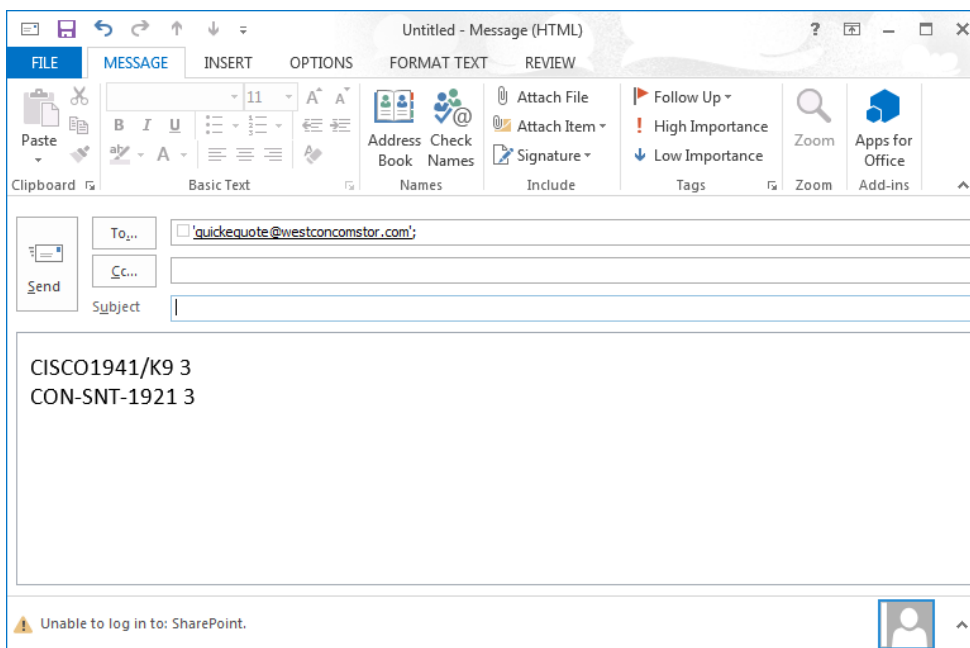

How to use Quick-e-Quote?

Send an email to quickequote@westconcomstor.com

Leave the subject blank, and list the part codes and quantities required in the body of the email. See image below.

TIPS:

- Each SKU must appear on its own line, with quantity after the part code separated by a space.
- You will need an active login eCommerce web login to use this service.

What Quick-e-Quote can and can't do:

- Quick-e-Quote currently works with the following vendors: Cisco, Polycom, Juniper, and SMART Technologies.
- Quick-e-Quote requires exact vendor part code.
- Quick-e-Quote does not validate configurations, add mandatory components or services, provide warnings on soon to be discontinued products, or provide any advice on product selection.
- Quick-e-Quote doesn't reflect multi-year support discounts for Cisco Services SKUs.
- Westcon-Comstor stocks Cisco 'spare' SKUs only. For your quote to reflect the correct availability you will need to input the Cisco spare SKU in place of the configured SKU, eg GLC-SX-MMD= (a spare SKU) instead of GLC-SX-MMD (a non-spare SKU).
