

Pulse Secure Appliances

Purpose Built for Next Gen Secure Access

The Pulse Secure Appliances deliver mobile and remote access to the data center via a single high-performance platform.

Re-energize customer engagement with the next generation PSA 300 and PSA 3000.

Mobile-Ready Access

Securely connect smartphones and tablets to the data center via per-app VPN and ActiveSync connectivity for email.

Reduced Time to Service

Designed with users in mind, easy to configure, install and deploy out of the box.

High Performance VPN

Support the latest security needs with impressive hardware performance and new support for HTML5 browsers and Windows 10 devices.

Superior Support

Backed by a world-class technical support and threat research team.

Entry-level PSA 300/3000 bundles

These bundles are designed to simplify the sales process for entry level opportunities and are available for the PSA300 or PSA3000 only. Bundles include PSA / PSA-support / Pulse Access Suite Essentials Edition software and services.

Duration

Expires December 31, 2018

Who can participate?

All Pulse Secure Connect Now partner program registered partners in EMEA.

What pricing should I use?

Bundles provide pre-authorized discounts. Contact your distributor for pricing requests.

How does it work?

1. Choose your appliance (PSA300/3000) and service type (SVC or PAR).
2. Select number of Essentials Edition users: 10, 25, 50, 100.
3. Select 1 or 3 year Next Day hardware support (SVC or PAR).
4. Select 1 or 3 year license Gold software support (SVC or PAR).
5. Request a bundle quote from your preferred distributor.

Qualifying Questions

- **What are the benefits of this bundle (for my customers)?**
Combine the hardware performance of the PSA with new software intelligence to support HTML5 browsers, Windows 10 PCs and mobile devices using on-demand, per-app VPN.
- **Who are the target customers?**
Enterprise, employee size 50~500.
- **Do you have branch office access needs?**
The PSA300 is designed for shelf-top use and is perfect for office environments.
- **Do you have an existing Juniper Networks SA Series VPN appliance or IC Series Unified Access Control appliance?**
The SA and IC have been end-of-lifed and can be upgraded to the high performance Pulse Secure Appliance (PSA).
- **Are your running SA or MAG appliances in a cluster configuration for performance?**
The PSA provides 3X performance of previous generation appliances which can minimize the need for clustering and simplify production deployments.

Mobilize Data Center Apps

Customers love the VPN performance and reliability of Pulse Connect Secure. Now, our latest bundles also includes per-app VPN support and an ActiveSync proxy to secure mobile access to the data center.

On-demand, Per-app VPN

Support any use case with a best-in-class Layer 3, Layer 4 VPN that includes industry leading rewriting capabilities and support for mobile devices, Windows 10 PCs, and HTML5 browsers.

ActiveSync Proxy

Protect email servers in the data center with an integrated ActiveSync proxy for mobile access.

Device Compliance

Ensure device compliance with broad endpoint OS support, host checking, and the ability to create complex remediation and enforcement rules for laptops and mobile devices.

Centralized Management

Pulse One Express provides a convenient, centralized dashboard to monitor and track multiple appliances.

Ordering Guide

Use the tables below to find the right hardware, software and services bundle. Service subscriptions are available for 1 and 3 years and include both SVC and PAR services. These bundles are for use in the EMEA region.
